

## NEW MODEL: TG- 521

The TG-521 is my newest original design. The idea came to me May 21st (5/21) of this year - 2015.

I wanted to design a whole new guitar around the 6-inline headstock I first used on my double-neck Guitar/Bass, which is slightly gothic looking - some people have said. The main feature to me is the top of the headstock where the outside curve meets the inside curve, forming a point.
